

The Benefits of Active Participation

As a member of our practice you will be given access to our patient resources library. The information in this section is provided to inspire you to take an active role in your treatment plan and empower you to embrace a healthier lifestyle. I've listed some of the benefits that can be derived from active participation below.

You begin to take an interest in your health.

You are more involved in developing the arrangements of your healthcare treatment before decisions are made.

You can become more capable of making healthy choices, accessing medical information and possibly offering support to others.

You become more knowledgeable of the treatment objectives, recovery process and Dr. Giantinoto's expectations.

You can learn how to determine what is a minor injury or ailment, and become empowered to appropriately and effectively apply self-care.

You'll experience an increase in your level of awareness of how our services can provide practical help for others within your circle of influence.

A deeper sense of satisfaction from your treatment plan because you were involved in the decision making process, and actively participated in the care plan.

You can contribute to the efficiency and effectiveness of future treatment plans and protocols by providing valuable feedback to Dr. Giantinoto.
