

A Breath of Fresh Air

You waited all winter to get outside. Don't let seasonal stresses keep you indoors.

Talk to your health care professional to see which products can provide seasonal stress support.

Driven by Quality

Standard Process is committed to growing and sourcing the highest quality ingredients. For products that can't be grown on our certified organic farm, we go to great lengths to find sources that practice sustainable methods and apply high-quality standards. Standard Process products are formulated in our facility, analyzed to validate label claims, and tested for the presence of heavy metals. As a third-generation, family-owned company, we stand behind our holistic approach to nutritional health.

Vegan are devoid of animal-based tissue, animal-based gelatin, or fish oils. They are also devoid of animal-based ingredients such as dairy, eggs, honey, beeswax, and lanolin.

Vegetarian are considered lacto-ovo vegetarian, which means they are devoid of animal-based tissue, but may contain ingredients from animals such as dairy, eggs, honey, or beeswax.

Gluten-Free have been tested to verify they meet the regulations associated with the United States Food and Drug Administration's gluten-free labeling.

Non-Dairy have been formulated to not contain milk or milk-derived ingredients.

Non-Soy have been formulated to not contain soy or soy-derived ingredients.

Non-Grain have been formulated to not contain any true cereal grain or grain-derived ingredients such as those from wheat, rice, oats, cornmeal, barley, or another cereal grain.

Environmental Stress Support

Help your body stand up to environmental challenges

High-quality ingredients that work the way nature intended.

The Building Blocks of the Body's Defense

When the body's natural histamine response function kicks in, many other systems are affected. These systems include the immune and respiratory systems, liver, and adrenal glands.

Building up defenses helps make sure these systems are working at optimal levels to support patient health.

Immune System: An environmental substance coming into contact with the body can create stress on the immune system.

Respiratory System: The histamine response function naturally causes muscle constriction in the lung's bronchial tubes.

Liver: During a challenge, support for the liver encourages detoxification of the body.

Adrenal Glands: If the body is under stress, adrenal glands secrete cortisol. This assists with the body's natural response function and helps to combat the system's interaction with environmental substances.

Support Your Body's Defenses

Environmental stresses are a fact of life for many people. They can impact indoor and outdoor activities, making it more difficult to enjoy an active lifestyle.

Fortunately, Standard Process is a breath of fresh air. We offer a variety of supplements that contain whole food and other targeted ingredients that help support the body's ability to cope with a variety of challenges.

Talk to your health care professional to determine which products are right for you.

Adrenal Glands

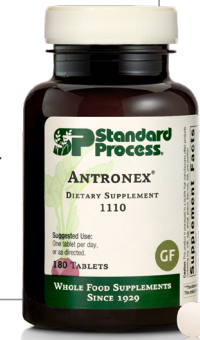

Drenamin[®] supports a healthy immune response to everyday environmental stressors. This formula also contains vitamins that are involved in healthy adrenal gland functions.*

Liver Health

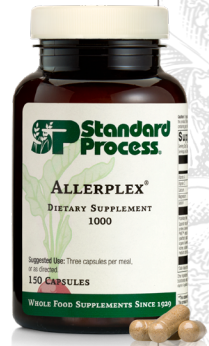

Antronex[®] contains bovine liver fat extract. Japanese researchers discovered a liver fat extract that was used to support the body's normal detoxification mechanisms.

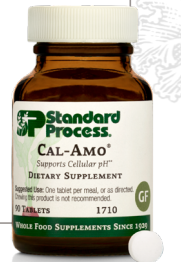

Immune System

Allerplex[®] is a good source of vitamin A and supports the body's ability to handle environmental challenges. This formula supports healthy lung and respiratory function and helps maintain healthy mucous membranes.*

Cal-Amo[®], when taken as directed, provides a daily dose of 300 mg (12%DV) of chloride which is useful in maintaining normal cellular pH.*

Respiratory System

Fen-Gre[®] contains Fenugreek, an ingredient that has been historically used to support healthy levels of mucus and phlegm in the lungs and bronchial tubes.*
