

- · Supports macronutrient digestion*
- Hydrochloric acid is involved in maintaining proper gastric pH*
- Includes stearic acid to coat the pancreatin, helping it to be digested in the correct area of the digestive tract*
- Provides enzymatic support for protein digestion*
- Supports the digestive environment of the GI tract*

Caution: This product is processed in a facility that manufactures other products containing soy, milk, egg, wheat, peanut, tree nuts, fish, and shellfish.

Supplement Facts

Serving Size: 2 Tablets Servings per Container: 165

Amount per Serving %Daily Value

Proprietary Blend

595 mg

Betaine hydrochloride, bovine pancreas CytosolTM extract, pepsin (1:10,000), pancreatin (3x), stearic acid (vegetable source), ammonium chloride, bovine spleen, and ovine spleen.

†Daily Value not established.

Other Ingredients: Cellulose and calcium stearate.

02

Digestive Support

Digestive concerns affect over 50 million Americans each year, many of whom require a visit to a health care professional. Many digestive concerns involve a reduction in the level of digestive enzymes that are endogenously being produced. Gastric acid and pepsin secretion can be affected by age. A healthy acid barrier is necessary for nutrient absorption and microbial balance.

Gastric pH Support

Hydrochloric acid (HCI) helps maintain a low pH in the stomach and plays important protective roles in the GI tract both for the absorption of nutrients and protection from the external environment.⁴

Enzyme Support

Supplemental enzymes support macronutrient digestion. 5-8

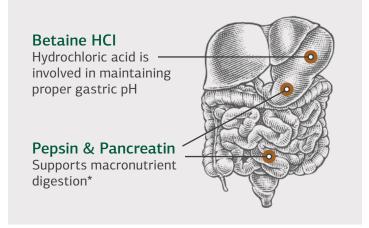

FIGURE 1: How Zypan supports the digestive environment of the GI tract.

Standard Process Enzymes Support	Zypan°	Zymex [®] II	Multizyme [®]	Enzycore
Protein Breakdown	✓	✓	✓	✓
Carb Breakdown	✓	✓	✓	✓

High-quality ingredients that work the way nature intended

Good Health Begins in Your Gut

A healthy digestive system is key to your overall health and well-being

Are You Experiencing These Symptoms of Poor Digestion?

People often become accustomed to dealing with unpleasant digestive challenges, such as:

Gas

Occasional Discomfort

Occasional Constipation

Occasional Bloating

Belching

Loose Stool

Your digestive system is about more than what foods you eat. A well-functioning digestive system is important to overall health and well-being.

More than 50 million Americans visit their health care providers each year due to digestive concerns.¹ As people age, the level of digestive enzymes in their bodies may diminish, which can lead to poor digestion. This can have many negative effects on the body that may include stress on the immune system, decreased energy levels, and a lowered ability to properly absorb nutrients.

Don't let poor digestion interfere with your dayto-day living. Creating healthy habits, along with supporting your diet with supplements, may help to support your digestion. Talk to your health care professional and develop a plan that's right for you.

Over 70 percent of your immune system is in your digestive tract, making healthy digestion key in overall wellness.
